Release notes for openPEPPOL Validation Artifact v3.6.0, Spring Release 2018

openPEPPOL AISBL

2018-04-16

This release from openPEPPOL includes changes to the validation artifacts (VA's) and it's planned that this version will become **mandatory in use from May 14th 2018 12:00 CEST**.

Core rules should only be considered a help to implementors creating a PEPPOL BIS, making sure that documents are PEPPOL Core conformant. **The core rules should not be used in run time enviroments.**

Messages should not contain empty UBL elements as these are likely to fail well-formed test and lead to messages being rejected by receiver.

== Changes to Validation Artifacts (VA)

Table 1. Changes pr. transaction

Transaction	Rule	Description
Order agreement	EUGEN-T110-R005	Text in BIS document changed to align with rule. No change to rule.
	EUGEN-T110-R024	Implementation of rule fixed so it correctly takes PrePaidAmount into the calculation..
Dispatch advice	BII2-T16-R018	Context of rule changed to item so that it checks for all lines.
