Release notes for openPEPPOL Validation Artifact v3.7.0, Fall Release 2018

openPEPPOL AISBL

2018-09-27

This release from openPEPPOL includes changes to the validation artifacts (VA's) and it's planned that this version will become **mandatory in use from November 15th 2019 12:00 CEST.**

> Core rules should only be considered a help to implementors creating a PEPPOL BIS, making sure that documents are PEPPOL Core conformant. **The core rules should not be used in run time enviroments.**

> Messages should not contain empty UBL elements as these are likely to fail well-formed test and lead to messages being rejected by receiver.

Changes to Validation Artifacts (VA)
